I MANAGE

- اكتب خطوات العل بالتقعييل لجميع الأسئلة داخل دفتر الإماية [الإجابة على ورقة الأسئلة غين معاددة].
 علقا بأن عدد الأسئلة (٤). وعدد الصفحات (٢).
 - 2- لا يسمح بالكتابة إلا بالقلم الأرق فقط
 - لا يسمع بشوال الألة العاسبة بون الطلاب.
 - 4- لا تستخدم الة حاسبة قابلة البرمعة أو الة حاسبة ترسم دوال

Question 1:

(6 Marks)

- A) Use the graph below of a function f to answer the following (if any):
- 1) lim f(x)
- 2) $2f(-6) + 3 \lim_{z \to 0} \frac{f(z)}{2z + 1}$
- Find the vertical asymptotes and horizontal asymptotes of f (if any).
- 4) Determine the =-coordinate(s) in domain of f at which the function is not differentiable.

B) Use the definition of the limit to prove that $\lim_{x\to 1} (1-2x) = 5$.

Question 2:

(8 Marks)

- A) Evaluate the following limits (if any):
- 1) $\lim_{z \to \infty} (z^2 2z + 1)$
- 3) $\lim_{z \to z^*} \frac{x|z| 4}{x 2}$

- 2) $\lim_{x\to 0} \frac{\sin(\tan 4x)}{x}$
- 4) $\lim_{x\to 4} \frac{\sqrt{x^2+5}-3}{x-4}$
- B) Use the Squeeze (Sandwich) Theorem to find $\lim_{x\to a} f(x)$, where

$$4z - 9 \le f(z) \le z^2 - 4z + 7$$

Question 3:

(5 Marks)

- A) Use the Intermediate Value Theorem to show that the function $\sqrt{x-3} = \frac{1}{x+5}$ has at least one real solution.
- B) Let $f(x) = \frac{x^3 x 6}{x + 2}$. Answer the following:
 - i) Determine where $f(x) = \frac{x^2 x 6}{x + 2}$ is continuous.
 - ii) Redefine the function in part (i) to make it continuous at x = -2.

Question 4:

(6 Marks)

- A) Discuss the continuity of $f(z) = \cos\left[\frac{1}{z-1}\right]$.
- B) Let $f(x) = \sqrt{x-4}$. Use the definition of derivative to find:
 - i) f'(z)
 - ii) D,
 - iii) The tangent line of f at z = 8.

Good Luck
